

## Energent - EMIS

### Update: FortisBC EnerTracker Program

Launched in January 2013, the EnerTracker Program provided participants access to energy management information software to pinpoint inefficiencies, help identify energy saving opportunities and track and report on savings achieved. This no cost program gave customers access to our award winning, web-based energy management software. FortisBC has recently announced that this program will end on December 31, 2016.

### Energent wants you to stay connected

To maintain our service, you must install the pulse hand-off module and service from FortisBC, which we will arrange on your behalf. Now is the time to secure the next-generation cloud-based technology platform that provides invaluable and timely insights into energy use.

### Energent is the number one choice for Energy Managers!

Energent's web-based software combines the model-based analytics of an Energy Management Information System with expert Energy Analyst services. We understand that managing energy is not an easy task and thus clients turn to us every day for the insight that enables them to make intelligent energy decisions.

**This exclusive offer is available to all FortisBC EnerTracker clients!**

### Our Solution Includes:

Installation Charge	Included
Commissioning Charge	Included
Annual Service Fee to Fortis	Included
Energy Analyst Setup (4 HRS)	Included
Multiple Site Discount	Available
Ongoing Energy Analyst Support	60min/ Month (additional time can be purchased)
Other Commodities (electricity, water, etc...)	Can be added cost-effectively
