Distributed Energy Resources

Reduce your Energy Costs with a Power System from Rodan

Zero Cost

Global Adjustment Savings

Power Reliability

Fully Managed

Demand Response Revenue

Turn-Key Installation

Rodan Energy will share in the Energy Savings achieved!

Today, over half the cost of electricity for large energy users is comprised of peak demand charges, which is based on when they use power.

Rodan Energy is a North American leader in demand-side management solutions for large electricity users. We can reduce your total energy expenditure by integrating power systems, controls, and peak advisory technology that will maximize demand response revenues along with savings from peak shaving opportunities.

Tesla Battery Storage

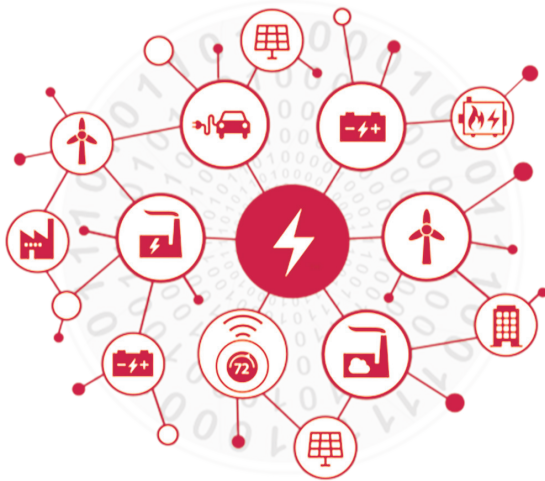

With Rodan Energy's ZERO COST turn-key energy platform, we can deliver long-term energy savings that will go right to your bottom line.

Choose the leading provider of distributed energy resources in Ontario

Rodan has been developing and operating a portfolio of distributed energy resources (DERs) at large commercial, industrial, and institutional facilities in Ontario for over a decade. Under our Power Savings model, Rodan Energy will build, own, and operate a power system at your facility that will reduce your peak electrical demand, provide demand response, and other ancillary services to the power grid. All the savings and revenues generated will be shared with you.

Gain your advantage in Ontario!

Rodan Energy's unparalleled knowledge of Ontario's electricity markets, our power system expertise, and advanced peak prediction and asset optimization tools enable our clients to achieve exceptional cost savings.

DER Platform Quick Facts

Robust, reliable, and clean

Run-time kept to a minimum

Quiet and non-intrusive

No disruption to facility operations

Clean and compliant with environmental regulations

Added power reliability during grid outages

Modular footprint

We can transform your power costs into a competitive advantage. Our comprehensive DER solution includes design, engineering, procurement, operation, and maintenance of a battery storage system or natural-gas peaking generator. Rodan Energy provides a fully managed solution with no capital expenditure or regulatory risk to you.

Get Started

Make the smart decision and allow Rodan to start reducing your total energy spend!
