Facility Intelligence

Rodan's Energy Information Systems

As energy prices rise, managing energy usage has become essential for organizations in all sectors.

Our Facility Intelligence (FI) software suite helps you understand how and when your facility is using energy. This information can also help you identify energy conservation and efficiency measures that will positively impact your energy use and most importantly, your energy budget!

Enabling the Intelligent Use of Energy

Rodan's state of the art software and industry expertise helps companies everyday in the following ways:

- Help all areas of the organization to understand an individual site's energy use
- Enable behaviour changes among employees to lower consumption
- Provide the basis for benchmarking across retail chains to raise every location and site level of energy efficiency

Rodan's solution combines the model-based analytics of an Energy Management Information System with expert energy analyst services. We understand that managing energy is not an easy task. Thus, clients turn to us every day for the insight that enables them to make intelligent energy decisions.

 <p>Energy Planning Our energy analysts are always available to help, whether you need ongoing support or a one-day planning session. Our energy management plans work for you.</p>	 <p>Energy Monitoring You cannot manage what you don't measure. Our FI platform allows you to monitor your facilities' data in real-time easily.</p>	 <p>Energy Targeting Rodan's FI platform incorporates custom energy models to identify and calculate how much energy you should be using by analyzing variables that drive energy use.</p>
 <p>Energy Reviews Quarterly meetings, weekly calls, yearly roadmaps, or daily notifications? What method works best for you to stay on top of your energy management strategy. The FI platform solution offers various options to review your facilities' and/or portfolios' energy performance.</p>	 <p>Portfolio Management Our FI platform efficiently manages a portfolio of buildings or large facilities with multiple divisions. It quickly identifies the best and worst performing buildings and compares them against each other.</p>	 <p>Energy Coaching Our expert energy analysts will help you devise a successful energy management plan.</p>

Rodan's FI is the preferred choice for progressive utilities as they deploy strong and successful conservation and demand management programs to their customers. As the smart grid infrastructure evolves and becomes a reality, Rodan has the all-asset optimization software to provide for efficient energy use behind-the-meter.

Industries We Support

Why Rodan Energy Solutions?

- We deliver intelligent energy solutions to power producers, distributors, and large users
- Leading provider of demand-side management solutions and energy intelligence technologies
- Largest demand response, metering services, and energy intelligence provider in Canada
