PowerTracker Software as a Service

The PowerTracker management system allows for tracking, auditing, risk management, and bill verification for your entire site portfolio. By combining our software with expert energy analysts allows for new cost saving discoveries along with the automation of your site portfolio.

PowerTracker Features

- Unique two-part service providing both a database and analyst to help industrials manage their entire power portfolio

- Our efficient and experienced team will analyze your data and perform critical cost-savings assessments on your billing data

Why Use Rodan's PowerTracker:

- Unique two-part service providing both a database and analyst
- Customized streams - pick and use only what you need
- Eliminates need for multiple contractors
- Provides billing certainty
- Auditable savings - easy to track
- Mitigates risk when divesting property
- Zero up front cost for Cost Savings stream. Only pay if we find cost savings opportunities

There are two ways to take advantage of Rodan's PowerTracker service:

Cost-Saving Opportunities (Shared Savings):

1. Locating sites for contract reduction opportunities or salvage (NOTE: a buy-down is a contract reduction opportunity)
2. Detect and manage power factor issues and implement changes when required
3. Verify past billing and meter reads to ensure correct utility charges
4. No up-front cost, Rodan takes a portion of the realized savings
5. If Rodan is unable to find cost-saving opportunities, there is no fee for the service
6. No risk, high reward

Risk Management Opportunities (Subscription):

1. Cost-centre verification and updates to ensure correct allocations
2. Manage grid connections from application through energization
3. Manage Acquisition and disposition of power sites and contracts
4. Put Rodan's team of expert energy analysts to work for you
5. Monthly subscription based on required services

The ability to pick and choose the "streams" of your choice enables you to customize the best solution for your power management needs.

About Rodan Energy Solutions

Rodan Energy delivers intelligent energy solutions to large consumers, distributors, and power producers. With our expertise in metering, Demand Response, energy analytics, and engineering, we enable our clients to reduce their total energy spend, enhance power system reliability, and help develop a sustainable energy future.
