

Facility Intelligence

Rodan's Energy Information Systems

As energy prices rise, managing energy usage has become essential for organizations in all sectors.

Our Facility Intelligence (FI) software suite helps you understand how and when your facility is using energy. This information can also help you identify energy conservation and efficiency measures that will positively impact your energy use and most importantly, your energy budget!

Enabling the Intelligent Use of Energy

Rodan's state of the art software and industry expertise helps companies every day in the following ways:

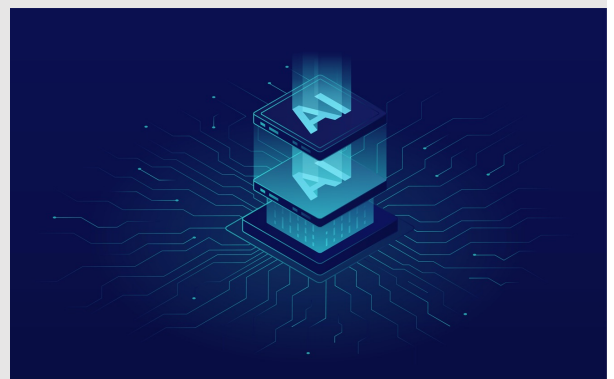

Helps all areas of an organization understand an individual site's energy use.

Enables behavior changes among employees to lower consumption.

Provides the basis for benchmarking across retail chains to increase energy efficiency at every location and site level.

Rodan's FI solution combines the model-based analytics of an Energy Management Information System with expert energy analyst services. We understand that managing energy is not an easy task. Thus, clients turn to us every day for the insight that enables them to make intelligent energy decisions.

What We Do

Energy Planning

Our energy analysts are always available to help, whether you need ongoing support or a one-day planning session. Our energy management plans work for you.

Energy Monitoring

You can't manage what you don't measure. Our Facility Intelligence platform allows you to monitor your facilities' data in real time easily.

Energy Targeting

Rodan's Facility Intelligence platform incorporates custom energy models to identify and calculate how much energy you should be using by analyzing variables that drive energy use.

Energy Reviews

Quarterly meetings, weekly calls, yearly roadmaps, or daily notifications. We offer a method that works best for you to stay on top of your energy management strategy. The FI platform solution offers various options to review your facilities' and/or portfolios' energy performance.

Portfolio Management

Our Facility Intelligence platform efficiently manages a portfolio of buildings and large facilities with multiple divisions. It quickly identifies the best and worst performing buildings and compares them against each other.

Energy Coaching

Our expert energy analysts will help you devise a successful energy management plan.

Rodan's Facility Intelligence platform is the preferred choice for progressive utilities as they deploy strong and successful conservation and demand management programs to their customers. As the smart grid infrastructure evolves and becomes a reality, Rodan has the all-asset optimization software to provide for efficient energy use behind-the-meter.
