

**Helping You Connect to the
Power Grid and Manage
Clean Energy Assets**

Connect Your Power Projects to the Grid

- Interconnections and ISO/utility Registrations
- Engineering Design, Connection Impact Assessments and Power Quality Analysis
- Metering, Telemetry and SCADA Systems
- Owner's Engineer and Commissioning

Optimize and Maximize your Revenue

- Energy Market Asset Optimization
- 24/7 Generation and Facility Dispatch Operations
- Renewable Energy Credit Certification and Reporting
- Meter Data Management & Settlement

Energy Intelligence

- Power Market Data and Analytics – Real Time and Historical

Rodan Energy Solutions

About Us

About Rodan Energy Solutions – for over 20 years we have been connecting power producers, utilities and large users to the electricity grid. As a leading North American developer and operator of distributed energy and grid scale power systems, we operate over 1,000MW of distributed energy resources.

We are committed to "Making Sustainable, Attainable."

Energy Intelligence Suite

Actionable energy intelligence tools providing real-time and historical market data and analytics. We help you with managing trading positions, hedging strategies, and dispatching/curtailment decisions to optimize your operations. Predictive reporting for system peaks and market prices driven by advanced analytics.

Facility Energy Optimization & Dispatch Operations

Trust Rodan to engineer, operate and optimize your power system to generate revenue and support your path to net zero. Our 24/7 Operations Center manages and dispatches over 1000 MW of power resources and monitors over \$3B in annual power flows across North America.

Power Systems Engineering

We manage your entire ISO/utility interconnection process. Our market experts and power systems engineers will ensure a quick and cost-effective process. We'll be with you every step of the way, from concept to designing, building, commissioning, operating and optimizing your assets.

Metering, Monitoring and Control

We deliver effective metering, settlement, monitoring and control systems (SCADA) for all types of grid connected and behind the meter power systems.

Multi-market Participation

Rodan manages and aggregates resources in multiple deregulated and integrated power systems markets. We are your one source for capacity market, contract implementation, renewable certificates and other programs across North America.
